

# Tutorial 4 : LoRaWAN Device classes.

A (LL)	Battery powered device. Each device uplink to the gateway and is followed by two downlink receiver windows.
B (eason)	Same as class A but these devices also open extra window at scheduled times.
C (ontinuous)	Same as A but these devices are continuously listening. Hence these devices use more power and often mains powered.

## Class A

## Class B

## Class C
